What we need from you

The website, app and admin designs are ready. To connect real store prices and launch, we need the items below. **Blocks launch** items stop us from going live; **Needed soon** items can follow shortly after.

1 Stores and prices

1.1	**The list of stores for launch**: the first 5 to 10 per market (Saudi Arabia, UAE, US, UK).	Blocks launch
1.2	**A product feed from each store**: the file or link (XML, CSV or JSON), plus any login or key the store requires. A sample from just one store is enough to start.	Blocks launch
1.3	**Affiliate accounts, approved**: Noon, an affiliate network (for example Awin or Admitad), and Amazon Associates for each country (amazon.sa, amazon.ae, amazon.com, amazon.co.uk). Approvals take weeks, so please apply now. Tell us which accounts you already hold.	Blocks launch
1.4	**The tracking-link format and the payment terms for each store** (commission or cost per click).	Blocks launch
1.5	**Product barcodes (EAN/GTIN)** for the products you want listed. We match store items to products by barcode; items without one cannot be matched.	Blocks launch

2 Legal approval

2.1	**Written approval from your Saudi legal adviser** that user accounts, favorites and price alerts may be stored on servers outside the Kingdom (we plan Frankfurt), or a requirement to host in Saudi Arabia instead. The Saudi data-protection law (PDPL) applies either way.	Blocks launch
2.2	**Final legal texts**: privacy policy, terms of use, disclaimer, cookie policy and affiliate disclosure. Ours are placeholders and must not be published as they are.	Blocks launch
2.3	**A contact for privacy requests**: the person or email that answers user data requests within 30 days.	Blocks launch

3 Accounts and ownership

3.1	**The website domain name** (bought in your company's name) and access to its DNS settings.	Blocks launch
3.2	**A company email address** for notifications (for example noreply@yourdomain) and DNS access to verify it, so price-alert emails reach inboxes.	Blocks launch
3.3	**Who will own the technical accounts** (database, hosting, email service). We set them up and transfer ownership to the email address you give us.	Blocks launch
3.4	**Admin users**: name, email and role (owner, catalog, partners or analyst) for each person who will use the admin portal.	Needed soon

4 Content and decisions

4.1	**Approval of the final screens** (English and Arabic) and the Arabic wording.	Blocks launch
4.2	**About us text** (mission and vision) in English and Arabic, if different from the draft.	Needed soon
4.3	**Product photos and logos**: confirmation that images from store feeds may be shown, or your own images. Today's photos are placeholders.	Needed soon
4.4	**Other Gulf markets** (Qatar, Kuwait, Bahrain, Oman): which to add first, with the stores for each.	Needed soon
4.5	**Native app decision**: is an App Store and Google Play listing required, or is an installable web app enough? A listing needs Apple and Google developer accounts in your company's name.	Needed soon

Please reply first with: 1.1 the store list, 1.2 one sample feed, 1.3 the affiliate accounts you already hold, and 2.1 the name of your Saudi legal adviser. Those four let us start straight away.
